At the time of completion of this article, the author was a student assistant at the Chair of Constitutional and Administrative Law, Public International Law, European and International Economic Law (Professor Dr. Hans-Georg Dederer) of the University of Passau, Germany.

Abstract

Illegal fishing in the Exclusive Economic Zones [EEZs] of developing coastal States is an urgent problem for the marine environment, global food security, and local economies. While past academic debate has predominantly focused on obligations of flag States to tackle so called IUU-fishing in the High Seas, the recent request for an advisory opinion submitted by the Sub-Regional Fisheries Commission to the International Tribunal for the Law of the Sea (ITLOS, *Case No. 21*) has drawn attention to the fisheries regime of the EEZ. This article argues that the primary responsibility for fisheries management in the EEZ rests on the coastal State and that, so far, flag States have no obligation under customary international law to exercise their jurisdiction and control over vessels flying their flag which fish in the EEZ of other States. The article first gives an account of coastal State regulatory and enforcement jurisdiction. It outlines recent developments of the law by drawing on the jurisprudence of the ITLOS, particularly the recent *M/V "Virginia G" Case*. Further, the article undertakes to identify potential flag State obligations to combat illegal fishing in the EEZ. To that end, it provides an in-depth analysis of relevant binding and non-binding legal instruments such as the 1982 *UN Convention on the Law of the Sea*, other multilateral treaties, bilateral fisheries treaties, and relevant soft-law instruments of the Food and Agriculture Organization of the United Nations. The article also discusses the relevance of principles of international environmental law. Next, the article analyzes the nature and scope of potential flag State obligations, qualifying them as obligations of due diligence. Finally, the article concludes that, *de lege lata*, no persuasive evidence of established flag State obligations exists. The author suggests that the situation should be remedied by a new, fully binding legal instrument.

A. Introduction

The state of global fish stocks is alarming. According to the annual report of the Food and Agriculture Organization of the United Nations [FAO], global catches peaked at 86.4 million tonnes in 1996 and have generally been decreasing since.¹ While the size of the global fishing fleet has remained stable at 4.72

¹ FAO, *The State of World Fisheries and Aquaculture* (2014), available at <http://www.fao.org/3/a-i3720e.pdf> (last visited 10 March 2015), 37 [FAO, *State of World Fisheries*].

million vessels,² only 79.7 million tonnes of fish were caught in 2012.³ At the same time, only 9.9% of fish stocks still showed potential for an increase of catches in 2011.⁴ About 61.3% of commercially exploited marine fish stocks were fully fished and 28.8% were found to be overfished.⁵ These statistics prove the 1995 Kyoto Declaration right, which estimated that from 2010 fish stocks would not be able to satisfy the growing demand for fish products.⁶ One of the main causes for the worldwide decline in fish stocks is the so-called “illegal, unreported and unregulated fishing” [IUU-fishing].⁷ According to recent studies, IUU-fishing generates between USD 4 and 9 billion in revenues annually.⁸ While the international community’s main focus was on IUU-fishing in the High Seas during the past two decades, the bulk of global IUU-fishing (or simply “illegal fishing” for the present purposes⁹) actually took place in the EEZs of coastal

² *Ibid.*, 32-33. The Asian fleet alone accounts for as much as 3.23 million vessels.

³ FAO, *Fishery and Aquaculture Statistics*, Yearbook 2012 (published in 2014), available at <http://www.fao.org/3/a-i3740t.pdf> (last visited 10 March 2015), 7.

⁴ FAO, *State of World Fisheries*, *supra* note 1, 37.

⁵ *Ibid.*, 347.

⁶ International Conference on the Sustainable Contribution of Fisheries to Food Security, *Kyoto Declaration and Plan of Action on the Sustainable Contribution of Fisheries to Food* (1995), available at <http://www.un.org/esa/documents/ecosoc/cn17/1996/ecn171996-29.htm> (last visited 19 January 2015), Article 3.

⁷ The term was first defined in para. 3 of the FAO’s *International Plan of Action to Prevent, Deter and Eliminate Illegal, Unreported and Unregulated Fishing* (2001) [IPOA-IUU], available at <ftp://ftp.fao.org/docrep/fao/012/y1224e/y1224e00.pdf> (last visited 30 March 2015).

⁸ High Seas Task Force, *Closing the Net: Stopping Illegal Fishing on the High Seas* (2006), available at <http://www.oecd.org/sd-roundtable/papersandpublications/39375276.pdf> (last visited 30 March 2015), 3.

⁹ Whether the term “IUU-fishing” has led to more clarity in the context of EEZ fisheries can be doubted. Foreign fishing in the EEZ is “illegal” (para. 3.1 IPOA-IUU) when conducted “without the permission of [the coastal State], or in contravention of its laws and regulations”. Consequently, “unreported” (para. 3.2 IPOA-IUU) fishing activities, which “have not been reported, or have been misreported, to the relevant national authority, in contravention of national laws and regulations” are simply a form of “illegal” fishing. Relevant ITLOS cases are *The “Hoshinmaru” Case (Japan v. Russian Federation)*, ITLOS, *Case No. 14, Prompt Release*, Judgment, 6 August 2007; *The “Tomimaru” Case (Japan v. Russian Federation)*, ITLOS, *Case No. 15, Prompt Release*, Judgment, 6 August 2007. The relevance of „unregulated“ (paras 3.3.1, 3.3.2 IPOA-IUU) fishing is limited to situations in the High Seas, as fishing in the EEZ will hardly ever be entirely “unregulated“ due to the fishing laws and regulations of the coastal State. In conclusion, two of three components of the term IUU-fishing are redundant in the EEZ. It suffices to refer to them as “illegal fishing”, especially as the definition is expressly not binding (para. 4 IPOA-IUU). See D. M. Sodik, ‘Non-Legally Binding International Fisheries Instruments and Measures to Combat Illegal, Unreported and Unregulated Fishing’, 15 *Australian International Law Journal* (2008) 1, 129, 134.

States.¹⁰ Due to their extensive EEZs, which are rich in fisheries,¹¹ and their lack of resources for purposes of monitoring and enforcement,¹² West African States are particularly vulnerable to illegal fishing.¹³ On 27 March 2013, the Sub-Regional Fisheries Commission [SRFC],¹⁴ a Regional Fisheries Organization [RFMO] of West African States, submitted a request for an advisory opinion to the International Tribunal for the Law of the Sea [ITLOS] in Hamburg. The first of the four questions submitted by the SRFC reads: “What are the obligations of the flag State in cases where illegal, unreported and unregulated [IUU] fishing activities are conducted within the Exclusive Economic Zones of third party States?”¹⁵ With its request, the SRFC seems to have followed recent calls for an advisory opinion to clarify flag State responsibilities.¹⁶

¹⁰ About USD 1.25 billion of the USD 4 to 9 billion in revenues from illegal fishing originate from the High Seas and the remaining part (USD 2,75 to 7,75 billion) from the EEZs of coastal States.

¹¹ About 90% of global fish stocks are located in the EEZs of coastal States. See J. Gulland, ‘Developing Countries and the New Law of the Sea’, 22 *Oceanus Magazine* (1979) 1, 36. The area above the continental shelves down to the 200m isobath is estimated to cover about 87% of commercially exploited fish stocks. See R. Dupuy, *L’océan partagé - analyse d’une négociation (Troisième Conférence des Nations Unies sur le Droit de la mer)*, 1st ed. (1979), 87.

¹² Two main drivers of IUU-fishing are the low demonstration effect due to insufficient monitoring, control and surveillance, and the low deterrence effect due to inadequate enforcement and sanctions. See C. Schmidt, ‘Economic Drivers of Illegal, Unreported and Unregulated (IUU) Fishing’, 20 *International Journal of Marine and Coastal Law*. (2005), 479, 485-487. Even developed coastal States such as the United States are struggling to eradicate illegal fishing in their EEZs. C. H. Allen, ‘Doctrine of Hot Pursuit: A Functional Interpretation Adaptable to Emerging Maritime Law Enforcement Technologies and Practices’, 20 *Ocean Development and International Law* (1989), 309, 311.

¹³ West African States incur losses of an estimated USD 1 billion due to illegal fishing annually. As a result, conservation measures of coastal States are undermined and fish stocks collapse, negatively affecting the livelihood of local fishing communities and the profitability of the local fishing industry. See High Seas Task Force, *supra* note 8,16.

¹⁴ The seven member States are: Republic of Cabo Verde, Republic of the Gambia, Republic of Guinea, Republic of Guinea-Bissau, Islamic Republic of Mauritania, Republic of Senegal, Republic of Sierra Leone. See <http://www.spcsrp.org/> (French only, last visited 30 March 2015).

¹⁵ Request for Advisory Opinion, ITLOS, *Case No. 21* (27 March 2013). All documents relating to the written proceedings and the verbatim records of the oral hearings in ITLOS, *Case No. 21* are available at <http://www.itlos.org/index.php?id=252> (last visited 30 March 2015).

¹⁶ T. M. Ndiaye, ‘Illegal, Unreported and Unregulated Fishing: Responses in General and in West Africa’, 10 *Chinese Journal of International Law* (2011) 2, 373, 395-396; For calls for a “model case”, see also Department of Fisheries and Oceans of Canada, *Expert Workshop on Flag State Responsibilities: Assessing Performance and Taking Action* (2008),

This article aims to contribute to that clarification,¹⁷ and includes both an analysis of the written and oral submissions of States, international organizations and NGOs during the proceedings and is restricted to illegal fishing in the EEZ.¹⁸ It will first analyze the regulatory and enforcement jurisdiction of the coastal State to draw a sufficiently clear picture of coastal State responsibilities underlying the regime of the EEZ (section B.). In order to identify and define potential flag State obligations to combat illegal fishing, it will then analyze the relevant provisions of the 1982 *United Nations Convention on the Law of the Sea* [UNCLOS]¹⁹ and other multilateral conventions, soft-law instruments, as well as bilateral treaty practice and principles of international environmental law (section C.). This analysis will be followed by a conclusion (section D.).

B. Regulatory and Enforcement Jurisdiction of the Coastal State in its EEZ

Considering how the zonal system of *UNCLOS* adopts the perspective of the coastal State, potential flag State obligations in the EEZ cannot be analyzed without first taking a look at coastal States' jurisdiction and competences. It is now generally accepted that most of the EEZ regime of Part V of *UNCLOS* represents customary international law.²⁰ The EEZ is a maritime zone *sui generis*,²¹ which combines fundamental freedoms of the High Seas (in particular

available at <http://www.dfo-mpo.gc.ca/international/documents/flag-state-eng.htm> (last visited 30 March 2015), 11.

¹⁷ Note also G. Handl, 'Flag State Responsibility for Illegal, Unreported and Unregulated Fishing in Foreign EEZs', 44 *Environmental Policy and Law* (2014) 1-2, 158.

¹⁸ The legal implications of fishing activities in the Territorial Sea, Archipelagic Waters and Internal Waters of coastal States will not be analyzed. Sedentary species, which are defined by Article 77 (4) *UNCLOS* as "organisms which, at the harvestable stage, either are immobile on or under the seabed or are unable to move except in constant physical contact with the seabed or the subsoil" are covered by the regime of the Continental Shelf and not that of the EEZ. See Article 68 *UNCLOS*. See also D. Harris, *Cases and Materials on International Law*, 7th ed. (2010), 396, para. 4.

United States of America)*, Judgment, ICJ Reports 1984, 246, 294; *Maritime Delimitation in the Area between Greenland and Jan Mayen (Denmark v. Norway)*, Judgment, ICJ Reports 1993, 38, 59.

²¹ D. Nelson, 'Exclusive Economic Zone', in R. Wolfrum (ed), *Max Planck Encyclopedia of Public International Law*, Vol III (2008), 1035, 1038, para. 14. Views that the EEZ remains part of the High Seas are difficult to uphold in light of the wording of

the freedom of navigation, Article 58 (1) *UNCLOS*) with certain sovereign rights of coastal States, thereby creating considerable tension between the two.²² As stated by Article 56 (1) (a) *UNCLOS* the coastal State has, *inter alia*, sovereign rights for the purpose of exploring, and exploiting, conserving, and managing the living natural resources in its EEZ. Those sovereign rights must be distinguished from the coastal State's full sovereignty over the Territorial Sea, as they are limited *ratione materiae* to the resources of the EEZ.²³ Thus, the EEZ succeeds earlier concepts of preferential fishing rights in an area beyond the Territorial Sea.²⁴ In order to exercise its sovereign rights, the coastal State may regulate EEZ fisheries in accordance with Articles 61, 62 *UNCLOS* and enforce its fisheries laws pursuant to Article 73 *UNCLOS*.

I. Regulatory Jurisdiction of the Coastal State

The coastal State determines the allowable catch pursuant to Article 61 (1) *UNCLOS* and must take proper conservation and management measures in order to ensure that the maintenance of the living resources in the EEZ is not endangered by over-exploitation pursuant to Article 61 (2) *UNCLOS*. As stated by Article 62 *UNCLOS* the coastal State must at the same time promote the objective of optimum utilization of the living resources. It has an obligation to give other States access to any possible surplus of the allowable catch that it cannot harvest itself.²⁵ Nationals of other States must comply with the fishing laws and regulations of the coastal State in its EEZ pursuant to Articles 56 (1) (a), 62 (4) *UNCLOS*,²⁶ which involve, *inter alia*, licensing schemes, catch quotas, reporting duties, monitoring, landing of catches, and

Article 55 *UNCLOS* ("The exclusive economic zone is [...] subject to [a] specific legal regime") and Article 86 *UNCLOS* ("The provisions [on the High Seas] apply to all parts of the sea that are not included in the exclusive economic zone"). For a more nuanced approach, see A. Proelss, 'The Law on the Exclusive Economic Zone in Perspective: Legal Status and Resolution of User Conflicts Revisited', 26 *Ocean Yearbook* (2012), 87, 88 ff.

²⁴ See *Fisheries Jurisdiction (United Kingdom of Great Britain and Northern Ireland v. Iceland)*, Judgment, ICJ Reports 1974, 3, paras 55-60; *Fisheries Jurisdiction (Federal Republic of Germany v. Iceland)*, Judgment, ICJ Reports 1974, 175, paras 47-52.

²⁵ For details, see *infra*, section C.III.

²⁶ It should be noted that Article 62 (4) *UNCLOS* is not a separate basis for jurisdiction, but merely concretizes Article 56 (1) (a) *UNCLOS*.

enforcement procedures.²⁷ Technological progress and an increasingly global economy have changed modern fishing practices. Many activities which are today a common feature of international fisheries, are not expressly mentioned in Article 62 (4) *UNCLOS*. Large industrial fishing vessels can now stay at sea for long periods of time as they are accompanied by factory and refrigerator vessels on which they transship their catches, by tankers which supply them with oil and gas as fuel (so-called “bunkering”), and by other support vessels which deliver supplies and workers.²⁸ For the purposes of this article, those recent practices can roughly be pooled into two main categories: (1) handling of catches such as transshipment, processing, refrigerating and transport of caught fish, (2) support of fishing vessels such as bunkering and supply with provisions and personnel. Those activities are arguably not essential elements of (and do not exclusively apply to) fishing, but are nonetheless characteristic of contemporary fishing practices. The question of whether they can be regulated by the coastal State is of utmost importance for combating illegal fishing in the EEZ. Where the coastal State has no jurisdiction, any legislative or enforcement measures will constitute an infringement of the flag State’s freedom of navigation in the EEZ pursuant to Article 58 (1) *UNCLOS*.²⁹

With respect to category (1), the arbitral tribunal in the *Case concerning filleting within the Gulf of St. Lawrence*, adopting a narrow interpretation of Article 56 (1) (a) *UNCLOS*, held that the coastal State’s sovereign rights to manage the living resources of the EEZ do not extend to the processing of fish caught in the EEZ.³⁰ It considered that Article 62 (4) *UNCLOS* did not cover activities substantially different from those listed.³¹ In the “*Juno Trader*” *Case*, the ITLOS was confronted with the issues of transshipment and transport of catch in the EEZ, but did not expressly address coastal State competences.³² It did, however, take into account Guinea-Bissau’s transshipment legislation

²⁷ The list in Article 62 (4) *UNCLOS* is not exhaustive, see M. H. Nordquist *et al.* (eds), *United Nations Convention on the Law of the Sea 1982: A Commentary*, Volume II, Article 1 to 85, Annexes I and II, Final Act, Annex II (1993), para. 62.16 (j) [Nordquist, Virginia Commentary Vol. II].

²⁸ See Ndiaye, *supra* note 16, 376.

²⁹ See *The M/V “Virginia G” Case (Panama v. Guinea-Bissau)*, ITLOS, *Case No. 19*, Merits, Judgment, 14 April 2014, para. 222. The ITLOS also notes that Article 58 *UNCLOS* must generally be read in conjunction with Article 56 *UNCLOS*.

³⁰ *Case concerning filleting within the Gulf of St. Lawrence between Canada and France*, 19 Reports of International Arbitral Awards (1986), 225, para. 50.

³¹ *Ibid.*, para. 52.

³² *The “Juno Trader” Case (Saint Vincent and the Grenadines v. Guinea-Bissau)*, ITLOS, *Case No. 13*, Judgment, 18 December 2004, paras 86-91.

for the purposes of calculating the “[...] reasonable bond [...]” pursuant to Article 73 (2) *UNCLOS*,³³ which can be read as an implicit acknowledgment of its conformity with *UNCLOS*.³⁴ Thus, the ITLOS disagreed with the arbitral tribunal in the *Gulf of St. Lawrence Case*.³⁵ However, it is often difficult to distinguish fishing activities and transport of catch in the EEZ from mere transport of catch of different origin through an EEZ.³⁶ The ITLOS touched upon this issue in the “*Monte Confurco*” Case and implicitly acknowledged the coastal State’s competence to oblige transiting fishing vessels to notify their entry into the EEZ.³⁷ Arguably, the coastal State may also adopt legislation providing for inspection of transiting fishing and transport vessels.³⁸ However, as mere transit as such is protected by the freedom of navigation, the coastal State may not interfere by, for example, denying certain fishing or transport vessels entry into its EEZ.³⁹ As for category (2), the question of the coastal State’s competence to regulate support activities came up in the *M/V “SAIGA” Case*, where Guinea had arrested a vessel for a breach of customs laws which regulated bunkering in Guinea’s EEZ.⁴⁰ While the ITLOS did not expressly state whether bunkering falls into the scope of coastal State jurisdiction,⁴¹ dissenting opinions of the minority show that the judgment can be read as implicitly deciding in favor of broad coastal State jurisdiction.⁴²

³³ *Ibid.*, paras 90, 95.

³⁴ See also Ndiaye, *supra* note 16, 393.

³⁵ The decision in the *Gulf of St. Lawrence Case* was also subject to heavy criticism by scholars as the interpretation of Articles 56 (1) (a), 62 (4) *UNCLOS* was perceived as unnecessarily narrow. See Ndiaye, *supra* note 16, 388, with further references.

³⁶ *Ibid.*, 393.

³⁷ *The “Monte Confurco” Case (Seychelles v. France)*, ITLOS, *Case No. 6, Prompt Release, Judgment*, 18 December 2000, paras. 81-83. For a similar case, see *The “Grand Prince” Case (Belize v. France)*, ITLOS, *Case No. 8, Prompt Release, Judgment*, 20 April 2000. See also Nordquist, *Virginia Commentary Vol. II, supra* note 27, para. 58.10 (c).

³⁹ Ndiaye, *supra* note 16, 393.

⁴⁰ *The M/V “SAIGA” Case (Saint Vincent and the Grenadines v. Guinea)*, ITLOS, *Case No. 1, Prompt Release, Judgment*, 4 December 1997.

⁴¹ *Ibid.*, para 59.

⁴² *Ibid.*, Dissenting Opinion of President Mensah, paras. 19-23; Dissenting Opinion of Vice-President Wolfrum and Judge Yamamoto, paras. 21-25. In the decision on the merits, the ITLOS did not elaborate further on the issue, but held that bunkering may at least not be regulated through customs laws. See *The M/V “SAIGA” (No. 2) Case (Saint Vincent and the Grenadines v. Guinea)*, ITLOS, *Case No. 2, Merits, Judgment*, 1 July 1999, para. 127, 138. Indeed, customs laws are restricted to the Territorial Sea and artificial islands, installations and structures (Article 60 (2) *UNCLOS*). As far as the Contiguous Zone is concerned, Article 33 (1) *UNCLOS* provides that the coastal State

The recent judgment of the ITLOS in the *M/V “Virginia G” Case*⁴³ provides clarification of the majority of the issues mentioned above. The *M/V “Virginia G”*, an oil tanker flying the flag of Panama, was supplying fuel to commercial fishing vessels in the EEZ of Guinea-Bissau.⁴⁴ On 21 August 2009 the *M/V “Virginia G”* was arrested by the authorities of Guinea-Bissau⁴⁵ for violation of fisheries laws by carrying out “fishing related activities in the form of ‘unauthorized sale of fuel to ships fishing in [Guinea-Bissau’s] EEZ’”⁴⁶. Panama disputed the legality of Guinea-Bissau’s measures and submitted the case to the ITLOS. One core question was whether Article 56 (1) (a) UNCLOS provided Guinea-Bissau with jurisdiction to regulate the bunkering of foreign fishing vessels in its EEZ.⁴⁷ Surprisingly,⁴⁸ the ITLOS *unanimously* found that the bunkering of fishing vessels falls indeed into the scope of Article 56 (1) (a) UNCLOS.⁴⁹ The ITLOS reaffirmed that the list in Article 62 (4) UNCLOS is not exhaustive, but required a “direct connection” of any regulated activity to fishing.⁵⁰ The bunkering of fishing vessels fulfills that criterion as it enables them to continue their fishing activities at sea without interruption.⁵¹ This finding, however, only applies to bunkering of vessels “engaged in fishing” and not bunkering in general.⁵² This leaves open whether there is a sufficiently close connection of bunkering of other associated vessels with fishing. In support of its conclusion, the ITLOS made reference to definitions of “fisheries related activities” in multiple international agreements,⁵³ including the 2009 FAO Agreement on Port State Measures [PSMA],⁵⁴ which provides in Article 1 (d):

may apply customs laws only for purposes of prevention or enforcement of violations in the Territorial Sea or Internal Waters. See Tanaka, *supra* note 23, 122.

⁴³ ITLOS, *The M/V “Virginia G” Case*, *supra* note 29.

⁴⁴ *Ibid.*, paras 55, 61-62.

⁴⁵ *Ibid.*, paras 61-62.

⁴⁶ *Ibid.*, para. 64.

⁴⁷ *Ibid.*, para. 161.

⁴⁸ The voting on the same issue in the *M/V “SAIGA” Case* was as close as 12/9. See ITLOS, *The M/V “SAIGA” Case*, *supra* note 40, para. 86.

⁴⁹ ITLOS, *The M/V “Virginia G” Case*, *supra* note 29, para. 452.

⁵⁰ *Ibid.*, para. 215.

⁵¹ *Ibid.*

⁵² *Ibid.*, para. 223. The judgment did not address the question of whether the coastal State has jurisdiction to regulate bunkering in general. *Ibid.*, para. 224. One declaration, however, concludes that the coastal State has such regulatory jurisdiction, referring to Articles 56 (1) (b) (iii), 211 (5), 220 UNCLOS. *Ibid.*, Joint Declaration of Judges Kelly and Attard, 1.

⁵³ ITLOS, *The M/V “Virginia G” Case*, *supra* note 29, para. 216.

⁵⁴ *Agreement on Port State Measures to Prevent, Deter and Eliminate Illegal, Unreported and Unregulated Fishing* (22 November 2009), available at <http://www.fao.org/fishery/psml/>

“[F]ishing related activities’ means any operation in support of, or in preparation for, fishing, including the landing, packaging, processing, transshipping or transporting of fish that have not been previously landed at a port, as well as the provisioning of personnel, fuel, gear and other supplies at sea.”

It seems that the ITLOS considers all activities mentioned in that definition to fall into the scope of Articles 56 (1) (a), 62 (4) *UNCLOS*,⁵⁵ and rightly so. As the provisioning of personnel, gear and other supplies is just as related to fishing activities as bunkering, all category (2) activities are surely included. Category (1) activities such as the “[...] landing, packaging, processing, transshipping or transporting of fish that have not been previously landed at a port [...]” are even more closely related to fishing than support activities. Therefore, it is only logical to apply the reasoning of the judgment *a fortiori* to such activities and to consider the award in the *Gulf of St. Lawrence Case*⁵⁶ overruled. However, the transport and on-board processing of catch that has previously been landed at port will generally be considered as mere transit and are, therefore, protected by the flag State’s freedom of navigation, with the limitations described above (for example the notification of entry into the EEZ, inspection of catches and secure stowing of fishing gear during transit⁵⁷).

II. Enforcement Jurisdiction of the Coastal State

In order to deter illegal fishing in its EEZ, the coastal State must be able to effectively enforce its fisheries laws. Today, effective enforcement is even more important to further legislative action. The lack of coastal State enforcement capacity is at the core of the call for flag State obligations. The basic enforcement measures available to the coastal State to ensure compliance with its fisheries laws and regulations in accordance with Articles 56 (1) (a), 73 (1) *UNCLOS*⁵⁸ include

agreement/en (last visited 25 October 2016).

⁵⁵ As the PSMA had not entered into force at the time of the judgment, the ITLOS certainly did not consider it to be binding as such, but rather as a definition that best reflects State practice regarding Arts. 56 (1) (a), 62 (4) *UNCLOS*.

⁵⁶ See *supra* note 26.

⁵⁷ T. Aqorau, ‘Illegal Fishing and Fisheries Law Enforcement in Small Island Developing States: The Pacific Islands Experience’, 15 *International Journal of Marine and Coastal Law* (2000) 1, 37, 46.

⁵⁸ Similar to Article 62 (4) *UNCLOS*, Article 73 *UNCLOS* is a concretization of Article 56 (1) (a) *UNCLOS*.

boarding, inspection, arrest and judicial proceedings.⁵⁹ In order to arrest foreign vessels suspected of fishing law violations, the coastal State can also carry out hot pursuit from the EEZ into the High Seas pursuant to Article 111 (2) *UNCLOS*.⁶⁰ Article 73 (2) *UNCLOS* provides, however, that arrested vessels and crews must be promptly released upon posting of a reasonable bond or other security.⁶¹ The ITLOS' approach to the reasonableness of the bond has proven to be a significant hurdle for effective and deterring enforcement measures. It considers that the bond must be of a financial nature, thereby excluding non-financial securities, for example "good-behavior bonds" such as conditions to carry a Vessel Monitoring System [VMS].⁶² Further concerns are the limitation on the amount that can reasonably be claimed as bond and the vague criteria the ITLOS uses to determine the amount, which lead to legal uncertainty.⁶³

As for sanctions under coastal State law, such as the recurring issue of confiscation (or forfeiture) of violating vessels and cargo, the *M/V "Virginia G" Case* provides some further insights.⁶⁴ The ITLOS interpreted Article 73 (1) *UNCLOS* in light of coastal State practice and held that it permits, in principle, confiscation laws and enforcement measures as long as they are "necessary to ensure compliance with the laws and regulations" of the coastal State.⁶⁵ As far as the legal basis

⁵⁹ The coastal State has a broad discretion with regard to enforcement measures. See Ndiaye, *supra* note 16, 380. Accordingly, the list of measures is not exhaustive. See M. Dahmani, *The Fisheries Regime of the Exclusive Economic Zone* (1987), 82.

⁶⁰ Today, the strict procedural requirements have become a hurdle to the effective use of modern technology for the purposes of hot pursuit. For details, see Allen, *supra* note 12, 311. The author suggests a functional interpretation of the procedural requirements that allows the use of modern technology. But note that the ITLOS rejected this approach with regard to the "signal to stop" requirement. See ITLOS, *The M/V "SAIGA" (No. 2) Case*, *supra* note 42, para. 148.

⁶¹ See generally J. Gao, 'Reasonableness of the Bond under Article 292 of the LOS Convention: Practice of the ITLOS', 7 *Chinese Journal of International Law* (2008) 1, 115, 115-142. To ensure compliance with Article 73 (2) *UNCLOS*, Article 292 *UNCLOS* contains a special prompt release procedure which has so far served as basis for nine out of twenty contentious cases before the ITLOS.

⁶² *The "Volga" Case (Russian Federation v. Australia)*, ITLOS, *Case No. 11, Prompt Release*, Judgment, 23 December 2002, para. 77; this narrow interpretation has attracted criticism by scholars. See for example S. Karim, 'Conflicts over Protection of Marine Living Resources: The 'Volga Case' Revisited', 3 *Goettingen Journal of International Law* (2011) 1, 101, 110-113.

⁶³ For an overview over the criteria, see D. H. Anderson, 'Prompt Release of Vessels and Crews', in R. Wolfrum (ed), *Max Planck Encyclopedia of Public International Law*, Vol. VIII (2008), 499, 504-505, paras. 21-33.

⁶⁴ The issue was already touched upon in ITLOS, *The "Tomimaru" Case*, *supra* note 9, paras 75-76.

⁶⁵ ITLOS, *The M/V "Virginia G" Case*, *supra* note 29, paras 256-257.

for confiscation is concerned, it must both afford the coastal State's authorities with flexibility in the sanctioning of violations and offer sufficient possibilities to challenge the confiscation before national courts.⁶⁶ The ITLOS also indicates that automatic forfeitures are illegal, because they are not "necessary".⁶⁷ In order for enforcement measures pursuant to Article 73 *UNCLOS in general* (including confiscation) to be necessary, they must satisfy a principle of reasonableness that demands due regard "[...] to be paid to the particular circumstances of the case and the gravity of the violation."⁶⁸ This is in conformity with the ITLOS' additional finding that Article 225 *UNCLOS*, which is found in Part XII of *UNCLOS* on the protection and preservation of the marine environment, equally applies to enforcement measures pursuant to Article 73 *UNCLOS*.⁶⁹ Thus, fisheries enforcement measures may not "endanger the safety of navigation or otherwise create any hazard to a vessel, or bring a vessel to an unsafe port or anchorage, or expose the marine environment to an unreasonable risk". The establishment of such a broad and imprecise principle that allows the ITLOS to interfere with individual enforcement measures leaves coastal States with great legal uncertainty. Finally, as stated by Article 73 (3) *UNCLOS*, penalties for violations of fisheries legislation may, in the absence of a specific agreement between the coastal State and the flag State, not include imprisonment or any other form of corporal punishment.⁷⁰ Article 73 (4) *UNCLOS* also obliges the coastal State to promptly notify the flag State in case of any arrest or detention and possible penalties imposed.⁷¹

⁶⁶ *Ibid.*, 256-257.

⁶⁷ *Ibid.*, 256-257. It follows that enforcement laws like the automatic forfeiture procedure (without court order) introduced by Australia in 1999 would probably be considered illegal. See R. Baird, 'Australia's Response to Illegal Foreign Fishing: A Case of winning the Battle but losing the Law?', 23 *International Journal of Marine and Coastal Law* (2008) 1, 95, 95-124.

⁶⁸ ITLOS, *The M/V "Virginia G" Case*, *supra* note 29, para. 270.

⁶⁹ *Ibid.*, para. 343.

⁷⁰ As the coastal State does not enjoy substantial criminal jurisdiction in the EEZ, this restriction leads to legal problems whenever illegal fishermen use force to evade arrest by the coastal State's authorities. See e.g. S. K. Kim, 'Illegal Chinese Fishing in the Yellow Sea: A Korean Officer's Perspective', 5 *Journal of East Asia and International Law* (2012) 2, 455, 469-471.

⁷¹ These provisions reflect the aim of *UNCLOS* to establish a balance between the interests of coastal States and flag States. See ITLOS, *The "Monte Confurco" Case*, *supra* note 37, paras 70-72. However, this balance has deteriorated. Today's commercial fishing fleets are controlled by private investors, whose identity is often concealed by a complex corporate web and many flag States are neither willing nor able to effectively exercise their control over them. See ITLOS, *The "Volga" Case*, *supra* note 62, Dissenting Opinion of Judge *ad hoc* Shearer, para. 19.

In conclusion, the EEZ regime of *UNCLOS* displays a clear primary responsibility of the coastal State for the management and conservation of the living resources. To this end, the coastal State has extensive legislative and enforcement jurisdiction. The recent jurisprudence of the ITLOS has further strengthened the regulatory competences of the coastal State, but has also set problematic limits with regard to enforcement measures. None of those developments suggest a normative shift away from coastal State responsibility. We shall keep this *status quo* in mind when analyzing the role of the flag State in this system in the next chapter.

C. Flag State Obligations to Combat Illegal Fishing in the EEZ of Other States

One of the most fundamental principles of the international law of the sea, now laid down in Article 91 (1) *UNCLOS*, is the right of all States to grant their nationality to ships.⁷² Flag States can define requirements for the granting of their nationality in their domestic law.⁷³ They enjoy parallel jurisdiction over their vessels in the EEZ pursuant to Articles 58 (2), 92 (1) *UNCLOS*.⁷⁴ In theory, flag States can therefore adopt, apply, and enforce strict laws governing activities of fishing vessels flying their flag in the EEZ of other States. Whether they have an obligation to do so first of all depends on whether they have concluded any agreements containing relevant duties. As many flag States (so-called “Flags of Non-Compliance”)⁷⁵ avoid such treaty obligations, fishing vessels flying their

⁷² This right was already well established in the early 20th century, as witnessed by Articles 4-5 of the *Convention on the High Seas*, 29 April 1958, 450 UNTS 11 [HSC].

⁷³ ITLOS, *The M/V “SAIGA” (No. 2) Case*, *supra* note 42, para. 63; See also C. Goodman, ‘Flag State Responsibility in International Fisheries Law - Effective Fact, Creative Fiction, or further work required?’, 23 *Australian & New Zealand Maritime Law Journal* (2009) 2, 157, 161.

⁷⁴ Article 92 (1) *UNCLOS* provides for exclusive flag State jurisdiction in the High Seas. Article 58 (2) *UNCLOS* transfers this jurisdiction into the EEZ, where it is no longer exclusive with respect to activities which fall under coastal State jurisdiction. M. H. Nordquist *et al.* (eds), *United Nations Convention on the Law of the Sea 1982: A Commentary*, Vol. III, Articles 86-132 & Documentary Annexes (1995), para. 92.6 (c) [Nordquist, Virginia Commentary Vol. III].

⁷⁵ In the fisheries context, the term “Flag of Non-Compliance” is preferable as some of the most notorious distant water fleets fly the flag of States which would not qualify as “Flags of Convenience” within the traditional meaning, as they do not maintain open registries. See D. König, ‘Flags of Convenience’, in R. Wolfrum (ed), *Max Planck Encyclopedia of Public International Law*, Volume IV (2008), 118, 122-123, para. 13.

flags do not have to fear strict regulation, monitoring and sanctions.⁷⁶ This underscores the potential importance of customary international law obligations of flag States, which the ITLOS may apply when interpreting *UNCLOS* in accordance with Article 293 (1) *UNCLOS*.⁷⁷ In order to identify and discuss potential obligations of customary international law, this section will provide an overview of the relevant provisions of *UNCLOS*, the most important other multilateral treaties and soft-law instruments, as well as bilateral treaty practice and relevant principles of international environmental law. Interestingly, nearly all statements touching upon the substance of the SRFC's questions submitted by States,⁷⁸ international organizations,⁷⁹ and NGOs⁸⁰ during the proceedings of ITLOS, *Case No. 21* conclude that flag States have an obligation to exercise effective jurisdiction and control over fishing activities of vessels flying their flag in the EEZ of other States.

I. United Nations Convention on the Law of the Sea 1982

Pursuant to Articles 58 (2), 94 (1) *UNCLOS*, the flag State has a general duty to effectively exercise its jurisdiction and control in administrative,

⁷⁶ *Ibid.*; see also J. K. Ferrell, 'Controlling Flags of Convenience: One Measure to Stop Overfishing of Collapsing Fish Stocks', 35 *Environmental Law* (2005) 2, 323, 333-337.

⁷⁷ See J. L. Jesus, 'Statement given to the Informal Meeting of Legal Advisers of Ministries of Foreign Affairs', New York (25 October 2010), available at http://www.itlos.org/fileadmin/itlos/documents/statements_of_president/jesus/legal_advisors_251010_eng.pdf (last visited 24 March 2015), 8.

⁷⁸ Written submissions, ITLOS, *Case No. 21*: First Written Statement of New Zealand (27 November 2013), paras 26-31; Second Written Statement of New Zealand (13 March 2014), paras 3-8; Written Statement of the Federal Republic of Somalia (27 November 2013), paras II(1)-(11); Written Statement of the Federated States of Micronesia (29 November 2013), paras 37 & 46; Written Statement of the Kingdom of the Netherlands (14 March 2013), paras 2.1-2.8; Written Statement of Japan (29 November 2013), paras 30-34 & 37-38; Written Statement of the Republic of Chile (29 November 2013), 7-13; Written Statement of the European Commission on behalf of the European Union (29 November 2013), paras 30-48; Written Statement of the Democratic Socialist Republic of Sri Lanka (18 December 2013), paras 10-17.

⁷⁹ Written submissions, ITLOS, *Case No. 21*: Written Statement of the International Union for Conservation of Nature and Natural Resources [IUCN] (25 November 2013), paras 26-38; Written Statement of the Caribbean Regional Fisheries Mechanism [CRFM] (27 November 2013), paras 83-167; Written Statement of the Central American Fisheries and Aquaculture Organization (16 December 2013), para. 1; Written Statement of the Sub-Regional Fisheries Commission [SRFC] (November 2013), 12.

⁸⁰ *Amicus Curiae* brief from WWF International (29 November 2013), paras. 20-32, available at https://www.itlos.org/fileadmin/itlos/documents/cases/case_no.21/written_statements_round2/21_II_WWF_amicus_brief.pdf (last visited 24. March 2015).

technical and social matters over ships flying its flag in the EEZ.⁸¹ This is an expression of the “genuine link” between flag State and vessel as required by Article 91 (1) *UNCLOS*.⁸² The duties laid down in Article 94 *UNCLOS* aim to ensure safety at sea.⁸³ There is no mention of duties regarding fishing activities.⁸⁴ It should be noted in particular that the wording “generally accepted international regulations, procedures and practices” in Article 94 (5) *UNCLOS* refers to rules of navigation introduced under the auspices of the International Maritime Organization [IMO],⁸⁵ and not fisheries agreements.⁸⁶ Thus, Article 94 *UNCLOS* does not contain any flag State obligations related to fishing. Nonetheless the obligation laid down in Article 94 (1) *UNCLOS* is the prototype of a flag State obligation, as most of the other flag State duties can only be discharged by the exercise of effective jurisdiction and control over the relevant vessels.⁸⁷ Flag States must, for example, adopt and enforce laws and regulations for the prevention, reduction and control of pollution of the

⁸¹ See also Article 5 (1) HSC. The duties of the flag State are stated in great detail in Article 94 (2) - (7) *UNCLOS*.

⁸² The ITLOS has held that the purpose of the “genuine link” concept is to ensure that flag States properly discharge their duties. Nonetheless, States which discover evidence indicating the absence of proper jurisdiction and control by a flag State over a vessel have to recognize the right of the ship to fly the flag of the flag State. See ITLOS, *The M/V “SAIGA” (No. 2) Case*, *supra* note 42, paras 82-83; *The M/V “Virginia G” Case*, *supra* note 29, paras 109-113. This interpretation renders the concept largely meaningless. For an in-depth discussion of the term, see A. D’Andrea, ‘The “Genuine Link” Concept in Responsible Fisheries: Legal Aspects and Recent Development’, 61 *FAO Legal Papers Online* (2006), available at http://www.fao.org/fileadmin/user_upload/legal/docs/lpo61.pdf (last visited at 24 March 2015).

⁸³ In so far they are complementing the exclusive flag State jurisdiction in the High Seas laid down in Article 92 (1) *UNCLOS*, which aims to protect the freedom of navigation. See *ILC Commentary to the Articles Concerning the Law of the Sea*, Yearbook of the International Law Commission (1956), Vol. II, 254, Commentary on Article 29, para. 3; Commentary on Article 30, para. 1.

⁸⁴ See A. Van Houtte, ‘Flag State Responsibility and the Contribution of Recent International Instruments in Preventing, Deterring and Eliminating IUU Fishing’, in FAO, *Report of the Expert Consultation on Fishing Vessels Operating under Open Registries and their Impact on Illegal, Unreported and Unregulated Fishing* (2003), FAO Fisheries Report No. 722 (2004), available at <ftp://ftp.fao.org/docrep/fao/006/y5244e/y5244e00.pdf> (last visited 23 March 2015), 47, 51.

⁸⁵ See e.g. the *International Convention for the Safety of Life at Sea*, 01 November 1974, 1184 UNTS 278 [SOLAS].

⁸⁶ See T. Zwinge, ‘Duties of Flag States to Implement and Enforce International Standards and Regulations - And Measures to Counter their Failure to Do So’, 10 *Journal of International Business & Law* (2011) 2, 297, 302-305; see also Goodman, *supra* note 73, 161.

⁸⁷ Nordquist, *Virginia Commentary Vol. III*, *supra* note 74, para. 94.8 (a).

marine environment from vessels flying their flag pursuant to Articles 211 (2), 217 *UNCLOS*.

Several statements submitted in ITLOS, *Case No. 21* claim that an obligation of flag States to ensure that vessels flying their flag comply with the coastal State's fishing laws and regulations in the EEZ can be read into Article 58 (3) *UNCLOS*.⁸⁸ However, Article 58 (3) *UNCLOS* applies only to situations in which flag States are "exercising their rights and performing their duties under [UNCLOS] in the [EEZ]". Those rights and duties are clearly defined in the first two paragraphs of Article 58 *UNCLOS*, which provide for the application of Articles 87-115 *UNCLOS* in the EEZ.⁸⁹ Those provisions do not deal with fishing.⁹⁰ At the same time, the provisions governing fisheries in the EEZ have their own separate place in Articles 61-73 *UNCLOS*.⁹¹ Thus, Article 58 (3) *UNCLOS* is not a suitable basis for flag State obligations concerning fishing activities.

Also Article 62 (4) *UNCLOS*⁹² is frequently cited as a possible basis for such an obligation.⁹³ While *UNCLOS* does not provide a definition of the term "national", it certainly refers to private vessels flying the flag of the relevant

⁸⁸ See e.g. Statement of Chile, *supra* note 78, 13; Statement of Sri Lanka, *supra* note 78, paras 14-15; First Statement of New Zealand, *supra* note 78, para. 28; Statement of Japan, *supra* note 78, para. 31; Statement of Micronesia, *supra* note 78, para. 29; Statement of Somalia, *supra* note 78, 6; Statement of the WWF, *supra* note 80, paras 23-32; Statement of the SRFC, *supra* note 79, 12; Article 58 (3) *UNCLOS* states: "In exercising their rights and performing their duties under this Convention in the [EEZ], States shall have due regard to the rights and duties of the coastal State and shall comply with the laws and regulations adopted by the coastal State [...]".

⁸⁹ Tanaka, *supra* note 23, 131. Any other interpretation would depart from the ordinary meaning of the wording in its context and in the light of its object and purpose. See Article 31 (1) of the *Vienna Convention on the Law of Treaties*, 23 May 1969, 1155 UNTS 331 [VCLT]. See also M. Fitzmaurice, 'The Practical Working of the Law of Treaties', in M. D. Evans (ed), *International Law*, 3rd ed. (2010), 172, 183-184.

⁹⁰ The freedom of fishing in the High Seas (Article 87 (1) (e) *UNCLOS*) was not included in Article 58 (1) *UNCLOS*, and the High Seas fishing provisions of Articles 116-120 *UNCLOS* were left out of Art. 58 (2) *UNCLOS*.

⁹¹ See also Nordquist, *Virginia Commentary Vol. II*, *supra* note 27, para. 58.10 (a).

⁹² In relevant part, Article 62 (4) *UNCLOS* states: "Nationals of other States fishing in the [EEZ] shall comply with the conservation measures and with the other terms and conditions established in the laws and regulations of the coastal State".

⁹³ See e.g. Statement of Chile, *supra* note 78, 8; Statement of the WWF, *supra* note 80, paras 22-32. One statement even goes so far to claim that States have a duty to exercise their effective jurisdiction and control over persons of their nationality. See further *Amicus Curiae* brief on behalf of WWF International (14 March 2014), available at https://www.itlos.org/fileadmin/itlos/documents/cases/case_no.21/written_statements_round2/21_II_WWF_amicus_brief.pdf (last visited 24 March 2015), paras. 25-29.

State.⁹⁴ However, flag State obligations in *UNCLOS*, like Articles 58 (3), 217 *UNCLOS* are generally phrased in a way that directly addresses the flag State, and not the nationals on whom it has to exercise effective control over.⁹⁵ The first sentence of Article 62 (4) *UNCLOS* therefore only addresses nationals of other States, not the flag State itself as their supervisor.⁹⁶

For these reasons, most scholars consider that, *de lege lata*, no flag State obligations to combat illegal fishing in the EEZs of other States can be read into any provisions of *UNCLOS*.⁹⁷ This conclusion is consistent with the system of coastal State responsibility in the EEZ explained in section B. above. The lack of ability of developing coastal States to appropriately discharge their responsibility was apparently not foreseen by the drafters of *UNCLOS*. This deficiency cannot convincingly be remedied by means of interpretation.

II. Other Multilateral Treaties and Soft-Law

There have been various attempts to fill the gaps in the fisheries regime of *UNCLOS* with the conclusion of new multilateral treaties. It is beyond the scope of this article to provide more than a broad overview of the existing instruments

⁹⁴ See Article 91 (1) *UNCLOS*, which is entitled “Nationality of ships”. An older definition of “nationals” which expressly includes “fishing boats or craft” can be found in Article 14 of the *Convention on Fishing and Conservation of the Living Resources of the High Seas*, 29 April 1958, 559 UNTS 285.

⁹⁵ But note the flawed interpretation of the CJEU in *European Parliament and European Commission v. Council of the European Union*, Joined Cases No. C-103/12 and No. C-165/12, Judgment of the Grand Chamber of 26 November 2014, 58 *Official Journal of the European Union* (2015) C 026/2, paras 62-65.

⁹⁶ Y. Takei, ‘Assessing Flag State Performance in Legal Terms: Clarifications of the Margin of Discretion’, 28 *The International Journal of Marine and Coastal Law* (2013) 1, 97, 108. This, however, does not mean that Article 62 (4) *UNCLOS* confers an obligation (that is an independent legal position) on private individuals. See – insofar correctly – CJEU, *European Parliament and European Commission v. Council of the European Union*, *supra* note 95, para. 32. The provision merely concretizes the coastal State’s jurisdiction to regulate its EEZ fisheries.

⁹⁷ *Ibid.*; Handl, *supra* note 17, 159; implicitly also Ndiaye, *supra* note 16, 378-382; R. Wolfrum, ‘The potential of the International Tribunal for the Law of the Sea in the management and conservation of marine living resources’, Presentation given by the Friends of the Tribunal at the Permanent Mission of Germany to the United Nations, New York (21 June 2007), available at http://www.itlos.org/fileadmin/itlos/documents/statements_of_president/wolfrum/friends_tribunal_210607_eng.pdf (last visited 26 March 2015), 4; for reservations of a more general nature, see also Goodman, *supra* note 73, 169; Zwinge, *supra* note 86, 322; for an opinion in favour of an obligation under *UNCLOS*, see Barret, *supra* note 38, 24-25.

and their relevance for fishing in the EEZ. The 1993 *FAO Compliance Agreement*⁹⁸ is the starting point of the legislative process to introduce flag State obligations and forms the basis for several other treaties and soft-law instruments.⁹⁹ It does, however, only apply to the High Seas¹⁰⁰ and has gained little support.¹⁰¹ The 1995 *UN Straddling Fishstocks Agreement*¹⁰² was the most successful multilateral agreement since *UNCLOS*.¹⁰³ It contains comprehensive flag State obligations to combat IUU-fishing, particularly through cooperation with RFMOs.¹⁰⁴ With the notable exception of Article 18 (3) (b) (iv) UNFSA, which obliges the flag State to ensure that vessels flying its flag do not conduct unauthorized fishing within areas under the national jurisdiction of other States, those duties apply to the High Seas.¹⁰⁵ Under Article 19 UNFSA, which also applies to Article 18 (3) (b) (iv) UNFSA, the flag State has a duty to take effective enforcement measures. Another treaty, the PSMA, adopts an entirely new approach by requiring port States to use their strategic importance to combat illegal fishing.¹⁰⁶

⁹⁸ FAO, *Agreement to Promote Compliance with International Conservation and Management Measures by Fishing Vessels on the High Seas*, 24 November 1993, 2221 UNTS 91 [Compliance Agreement].

⁹⁹ See in particular Article III Compliance Agreement, which obliges the flag State to exercise its jurisdiction and control over vessels flying its flag and provides a detailed list of individual duties.

¹⁰⁰ See Article II (1) Compliance Agreement.

¹⁰¹ Even 20 years after its conclusion, the Compliance Agreement only had 39 State parties. This level of participation is insufficient to deal with the problem, in particular because important fishing nations such as the People's Republic of China, the Kingdom of Thailand, and the Republic of India did not ratify the Compliance Agreement. See G. Hosch, 'Analysis of the Implementation and Impact of the FAO Code of Conduct for Responsible Fisheries since 1995', *FAO Fisheries and Aquaculture Circular No. 1038* (2009), 1, 28.

¹⁰² *Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks*, 4 December 1995, 2167 UNTS 3 [UNFSA].

¹⁰³ After the ratification of the Republic of the Philippines on 24 September 2014, the UNFSA now has 82 State parties. However, it did not reach the same level of participation as *UNCLOS*, particularly with respect to big fishing nations. See J. Friedrich, 'Legal Challenges of Nonbinding Instruments: The Case of the FAO Code of Conduct for Responsible Fisheries', 9 *German Law Journal* (2008) 11, 1539, 1547 footnote 27.

¹⁰⁴ Pursuant to Articles 18, 19 UNFSA the flag State has to exercise its jurisdiction and control over vessels flying its flag in the High Seas to ensure compliance with the rules of the competent RFMOs.

¹⁰⁵ See Article 3 (1) UNFSA.

¹⁰⁶ This approach is not completely new, as Article 23 UNFSA already provided for certain port state obligations. See T. L. McDorman, 'A Note on the May 2009 FAO Draft Agreement on Port State Measures to Prevent, Deter and Eliminate IUU Fishing', 27 *Chinese (Taiwan) Yearbook of International Law & Affairs* (2009), 131, 134.

Notably, Article 20 PSMA also contains obligations of flag States to cooperate with port States.¹⁰⁷ The PSMA entered into force only on 5 July 2016, thirty days after the date of deposit with the Director-General of FAO of the twenty-fifth instrument of ratification. As this overview shows, the existing multilateral conventions generally apply to the High Seas and most of them lack ratifications. Thus, their normative relevance for the EEZ is limited.¹⁰⁸

For nearly 20 years the FAO has attempted to remedy the lack of participation in binding treaties by adopting soft-law instruments.¹⁰⁹ Those soft-law instruments include the 1995 FAO Code of Conduct for Responsible Fisheries [CCRF],¹¹⁰ the 2001 IPOA-IUU,¹¹¹ and, most recently, the 2014 FAO Voluntary Guidelines for Flag State Performance [Voluntary Guidelines].¹¹² For the purposes of this article, it suffices to acknowledge that these instruments consistently call on flag States to exercise their jurisdiction and control over fishing vessels flying their flag in the EEZ (not just the High Seas)¹¹³ to ensure compliance with the laws and regulations of coastal States. The fact that the majority of those instruments has been created by, or in the framework of, the FAO, casts some doubt on their normative value.¹¹⁴ It speaks for itself that new soft-law instruments, which were agreed upon with broad support, often call on States to ratify the binding treaty instruments¹¹⁵ – with little success.¹¹⁶ Although many States are willing to support non-binding instruments calling for binding rules, they are unwilling to ratify the relevant binding treaties. Furthermore, the

¹⁰⁷ These obligations do also apply to the EEZs of States which are not parties to the PSMA. See Articles 3 (3), 1 (e) PSMA.

¹⁰⁸ A. Boyle, 'Soft-Law in International Law Making', in Evans (ed), *supra* note 89, 122, 137; Handl, *supra* note 17, 159.

¹⁰⁹ Friedrich, *supra* note 103. Soft-law is not binding under public international law, but it can codify pre-existing law and can be proof of *opinio iuris* and State practice. See Boyle, *supra* note 109, 134-137.

¹¹⁰ FAO, *Code of Conduct for Responsible Fisheries* (31 October 1995), available at <http://www.fao.org/docrep/005/v9878e/v9878e00.htm> (last visited 27 March 2015). See in particular Article 6.11, 8.2 CCRF.

¹¹¹ See *supra* note 7. See in particular paras 34-50 IPOA-IUU.

¹¹² FAO, *Voluntary Guidelines for Flag State Performance* (08 February 2013, endorsed by FAO Committee on Fisheries on 11 June 2014), available at ftp://ftp.fao.org/FI/DOCUMENT/tc-fsp/2013/VolGuidelines_adopted.pdf (last visited 27 March 2015). See in particular paras 2, 6, 8 & 39-43 of the Voluntary Guidelines. For further details, see Handl, *supra* note 17, 161.

¹¹³ See Article 1.2 CCRF; para. 3.1 IPOA-IUU; para. 3 of the Voluntary Guidelines.

¹¹⁴ See also Van Houtte, *supra* note 84, 59.

¹¹⁵ See e.g. Article 8.2.6 CCRF; para. 11 IPOA-IUU; GA Res. 67/79, UN Doc A/RES/67/79, 11 December 2012, 12.

¹¹⁶ The low number of ratifications of the *Compliance Agreement* illustrates this dilemma.

level of implementation by States is generally insufficient.¹¹⁷ Thus, for purposes of establishing *opinio iuris*, the FAO instruments seem to be little more than a diplomatic fig leaf for non-complying States.¹¹⁸

III. Bilateral Fisheries Treaties

The lack of binding rules for flag States has, at least in part, been substituted by coastal States on a bilateral level. As already mentioned above, the coastal State has an obligation pursuant to Article 62 (2) *UNCLOS* to grant other States access to any potential surplus of allowable catch that it cannot harvest itself, which is usually done by means of bilateral fisheries treaties (BFTs, or EEZ access agreements).¹¹⁹ However, as the coastal State has great discretion in determining the allowable catch, it can effectively circumvent this obligation.¹²⁰ Furthermore, Article 62 (3) *UNCLOS* empowers coastal States to carefully weigh their own interests against those of flag States. Thus, the selection of suitable partners for BFTs is in the discretion of the coastal State.¹²¹ In the absence of a BFT or other agreements, fishing vessels may not engage in any fishing activities in the EEZ unless they have acquired a permit outside of a treaty framework. This favorable negotiating position allows coastal States to tie EEZ access to treaty clauses which oblige flag States to ensure compliance of their fishing vessels with the coastal State's fisheries laws and regulations.¹²² Such "vessel compliance clauses" [VCCs]¹²³ have been a prominent feature in BFTs for the past three decades.¹²⁴

¹¹⁷ See e.g. Friedrich, *supra* note 103, 1561.

¹¹⁸ Nonetheless some authors seem to attach great weight to soft-law instruments in the fisheries context. See e.g. Handl, *supra* note 17, 162.

¹¹⁹ These are the agreements mentioned in Article 62 (2) *UNCLOS*. See Dahmani, *supra* note 59, 77-78. As the concept of the EEZ evolved before *UNCLOS* was finally agreed, the practice of concluding BFTs already began in the late 1970s and early 1980s between developing coastal States and developed fishing nations. See Van Houtte, *supra* note 84, 49.

¹²⁰ Y. Tanaka, 'The Changing Approaches to Conservation of Marine Living Resources in International Law', 71 *Heidelberg Journal of International Law (ZaöRV)* (2011) 2, 291, 298-299; R. R. Churchill & A. V. Lowe, *The Law of the Sea*, 3rd ed. (1999), 289.

¹²¹ Ndiaye, *supra* note 16, 379; Dahmani, *supra* note 59, 77-78; See also Nordquist, *Virginia Commentary Vol. II*, *supra* note 27, paras 62.16 (d)-62.16 (h).

¹²² B. Kwiatkowska, *The 200 Mile Exclusive Economic Zone in the New Law of the Sea* (1989), 87-88. However, it should also be noted that developing coastal States often depend on payments received by flag States and fishing corporations in return for EEZ access, which substantially weakens their negotiation position.

¹²³ Term used in the Statement of the IUCN, *supra* note 79, para. 28.

¹²⁴ It was not uncommon to include such clauses into BFTs even before *UNCLOS* entered into force in 1994. See Dahmani, *supra* note 59, 78-81. The FAO recommended the inclusion of VCCs as early as 1984. See *Report of the FAO World Conference on Fisheries*

The member States of the SRFC are also engaged in this practice.¹²⁵ VCCs take very different forms, and both their wording and content varies substantially. While an in-depth analysis of varieties of VCCs would be highly desirable, it is beyond the scope of this article. A modern, fully reciprocal example of a VCC can be found in Article 8 (1) of the 2009 EU-Russia BFT:¹²⁶

“Each Party shall, in accordance with its own laws, regulations and administrative rules, take the necessary steps to ensure the observance by their fishing vessels of rules and regulations established in law by the other Party for the exploitation of fishery resources in the Exclusive Economic Zone of that other Party in the Baltic Sea.”

Coastal States have also developed a variety of instruments to foster the inclusion of VCCs into BFTs. On a regional level, some multilateral fisheries management treaties require States parties to include VCCs into their BFTs. An example of such a “VCC-harmonization-clause” is Article 2 (c) (iv) of the *Nauru Agreement*,¹²⁷ which was concluded within the framework of the Pacific Islands Forum Fisheries Agency [FFA].¹²⁸ Considering that the FFA has 17 Pacific Island member States, such regional treaties have the potential to significantly increase the abundance and acceptance of VCCs. In order to prevent the conclusion of BFTs without the additional safeguard of a VCC, coastal States have also started to incorporate domestic legislation, which

Management and Development (1984), 18. The first known VCC which expressly referred to “Flag State Responsibility” was laid down in Article 4 of the *Treaty on Fisheries between Governments of certain Pacific Island States and the Government of the United States of America* (02 April 1984), 26 ILM 1053. See Van Houtte, *supra* note 84, 49.

¹²⁵ Ndiaye, *supra* note 16, 400-401.

¹²⁶ *Agreement between the European Community and the Government of the Russian Federation on cooperation in fisheries and the conservation of the living marine resources in the Baltic Sea* (28 May 2009), available at <http://faolex.fao.org/docs/pdf/bi-87793.pdf> (last visited 29 March 2015).

¹²⁷ *Nauru Agreement Concerning Cooperation in the Management of Fisheries of Common Interest* (11 February 1982), available at <http://faolex.fao.org/docs/pdf/mul5181.pdf> (last visited 01 April 2015). Another prominent example is Article IV (5) of the *Niue Treaty on Cooperation in Fisheries Surveillance and Law Enforcement in the South Pacific Region*, 09 July 1992, available at http://www.ffa.int/niue_treaty (last visited 29 March 2015). It requires State parties to “ensure that foreign fishing agreements with flag States require the flag State to take responsibility for the compliance by its flag vessels with the terms of any agreement and applicable laws”. See Van Houtte, *supra* note 84, 49.

¹²⁸ The FFA was founded in 1979 to promote sustainable EEZ management in the region. See <http://www.ffa.int/> (last visited 29 March 2015).

prohibits their governments to sign or ratify BFTs without such a clause.¹²⁹ Of course, such national legislation will generally remain ineffective on the public international law level.¹³⁰ It is, however, proof of growing State practice on behalf of the coastal States. Another special example is the Common Fisheries Policy of the European Union, which today involves the conclusion of EU-BFTs only with VCCs.¹³¹

Research by the IUCN shows that more than 80 of the nearly 150 coastal States worldwide are now engaged in this practice.¹³² Thus, most BFTs now contain a VCC. The majority of those which lack a VCC predate *UNCLOS* and their numbers are in steady decline. From the perspective of coastal States, there is therefore widespread and consistent practice. There also seems to be little opposition from flag States. To conclude that this practice is clear evidence of customary international law may, however, be too generous.¹³³ First, there still seems to be a fairly widespread practice of issuing private licenses outside of, or parallel to, BFT regimes.¹³⁴ Flag States will hardly be willing to accept responsibility under such circumstances. Second, every BFT is an individual bargain, which may take a significant amount of time and effort to negotiate. Such agreements are based on access to fisheries (granted by the coastal State) on the one hand and some form of consideration (promised by the flag State)

¹²⁹ See for example para. 38 (4) (a) of the 2007 *Gambian Fisheries Act*, available at <http://faolex.fao.org/docs/pdf/gam77403.pdf> (last visited 29 March 2015). For a non-exhaustive list with 17 examples, see Statement of the IUCN, *supra* note 79, 68-69, Annex A.

¹³⁰ See Article 27 (1) VCLT. See also *Certain German Interests in Polish Upper Silesia*, PCIJ Series A, No. 7 (1926), 19. Interesting questions may however arise with respect to the exception of Articles 46, 27 (3) VCLT. If the national legislation was properly published, a violation by conclusion of a BFT would probably be manifest within the meaning of Article 46 (2) VCLT. However, it seems doubtful whether such prohibitions could be classified as fundamental constitutional norms determining the competence to conclude treaties as required by Article 46 (1) VCLT. For a detailed discussion of the two requirements, see for example M. Bothe, 'Article 46: Provisions of internal law regarding competence to conclude treaties', in O. Corten & P. Klein (eds), *The Vienna Conventions on the Law of Treaties: A Commentary*, Vol. II (2011), 1090, 1094-1097.

¹³¹ See Statement of the EU, *supra* note 78, para. 44. See also Council Regulation (EC) No 1005/2008 establishing a Community system to prevent, deter and eliminate illegal, unreported and unregulated fishing (29 September 2008).

¹³² For a non-exhaustive list with 91 examples of BFTs with VCC, see Statement of the IUCN, *supra* note 79, 66-75, Annex B. Although not all of these agreements are still in force and some have yet to enter into force, they are evidence of significant State practice.

¹³³ But see Aqorau, *supra* note 57, 50; another author reaches this conclusion by way of an overall assessment of BFT practice, multilateral treaties, and soft-law instruments. See Handl, *supra* note 17, 162. A similar line of argument can be found in the Statement of the IUCN, *supra* note 79, paras 26-29.

¹³⁴ R. Churchill & D. Owen, *The EC Common Fisheries Policy* (2010), 351-359.

on the other. Often, the consideration consists of substantial amounts of money and acceptance of a set of additional rules that apply to the EEZ fisheries regime, including VCCs. Agreements between two coastal States with substantial fishing fleets may contain fully reciprocal obligations.¹³⁵ Depending on the circumstances, BFTs therefore contain varying arrangements and conditions. A BFT (at least if it does not contain fully reciprocal obligations) is therefore essentially a contractual treaty (*traité-contrat*), and not a legislative treaty (*traité-loi*). But even if one considers BFTs to be lawmaking treaties (and VCCs to possess “fundamentally norm-creating character”¹³⁶), they only cover situations in which the coastal State *has granted* EEZ access. The flag State accepts the obligation arising out of a VCC *on the condition* that its vessels may fish in the EEZ. Therefore, it cannot be inferred from the practice of concluding BFTs that, in absence of a BFT, flag States in general also accept *a fortiori* (that is without consideration) an obligation analogous to a VCC covering situations in which the coastal State *has not granted* EEZ access.¹³⁷ Any customary international law derived from BFTs would have to reflect this separation, leaving another (albeit smaller) lacuna in the EEZ regime.

IV. Obligations Derived From International Environmental Law

It is well established that States have an obligation to ensure that activities within their jurisdiction do not harm the environment within the jurisdiction of other States, or within areas beyond national jurisdiction.¹³⁸ This obligation was

¹³⁵ For a fully reciprocal BFT, see e.g. the 2009 EU-Russia BFT, *supra* note 127.

¹³⁶ *North Sea Continental Shelf Cases (Federal Republic of Germany v Denmark and The Netherlands)*, Judgment, ICJ Reports 1969, 3, 41-42 para. 72.

¹³⁷ There is also too little practice of flag States effectively exercising (enforcement) jurisdiction over vessels flying their flag in the EEZ of other States in absence of a BFT. Even where VCCs are in place, flag State enforcement is not guaranteed. See generally E. R. Fidell *et al.*, ‘Flag state measures to ensure compliance with coastal state fisheries regulations: the United States, Japanese and Spanish experience’, 6 *Fisheries Law Advisory Programme - EEZ, Circular* (1986); see also G. Moore, ‘Enforcement Without Force: New Techniques in Compliance Control for Foreign Fishing Operations Based on Regional Co-operation’, 24 *Ocean Development and International Law* (1993) 2, 197, 201.

Slovakia)*, Judgment, ICJ Reports 1997, 7, 41, para. 53; *Corfu Channel (United Kingdom of Great Britain and Northern Ireland v. Albania)*, Judgment, ICJ Reports 1949, 4, 22; see also *Construction of a Road in Costa Rica along the San Juan River (Nicaragua v. Costa Rica)*, Provisional Measures, Order of 13 December 2013, available at <http://www.icj-cij.org/docket/files/152/17838.pdf> (last visited 29 March 2015), 398, 403, para. 19 & 408, para. 37; P. Sands *et al.* (eds), *Principles of International Environmental Law*, 3rd ed. (2003), 196.

first described by the arbitral tribunal in the *Trail Smelter Case*¹³⁹, and can be based on the principles of sovereign equality of States,¹⁴⁰ and of mutual respect.¹⁴¹ It has also been laid down in Principle 21 of the 1972 *Stockholm Declaration*¹⁴² and repeated in various other important soft-law instruments.¹⁴³ Furthermore, it has been included in a number of binding agreements,¹⁴⁴ and in Article 3 of the *2001 Articles on Prevention of Transboundary Harm from Hazardous Activities*.¹⁴⁵ The obligation encompasses a “negative” prohibition of transboundary harm (the no harm principle), and a “positive” obligation to take steps to prevent transboundary harm (the preventive principle).¹⁴⁶ The preventive principle has, for example, been included in Article 194 (1) *UNCLOS* with respect to marine pollution,¹⁴⁷ and indirectly in Article 193 *UNCLOS* with respect to the marine environment.¹⁴⁸ Several statements submitted in ITLOS, *Case No. 21* claim that the preventive principle applies to fishing in the EEZ,¹⁴⁹ citing former ITLOS president Wolfrum.¹⁵⁰

¹⁴⁹ See Statement of the IUCN, *supra* note 79, paras 30-31; Statement of the CRFM, *supra* note 79, paras 155-157; Statement of the WWF, *supra* note 80, paras. 35-38.

¹⁵⁰ Wolfrum, *supra* note 97, 4.

While the living resources of the EEZ are undoubtedly part of the marine environment,¹⁵¹ it is less clear whether foreign fishing in the EEZ is an activity of a transboundary nature as envisaged by the preventive principle. The *ratio legis* of the preventive principle is that, under public international law, States cannot lawfully exercise jurisdiction in the territory of other States to prevent transboundary harm originating therein, and therefore a rule guaranteeing protection is needed. This *ratio* equally applies to other situations in which one State has exclusive jurisdiction over the source of harm, such as flag State jurisdiction on the High Seas. In the EEZ, however, the coastal State is not only *able* to exercise its prescriptive and enforcement jurisdiction over foreign fishing vessels – it has the *primary responsibility* to do so. It is true that, as Handl points out, the flag State *can* exercise its parallel prescriptive and enforcement jurisdiction over fishing vessels flying its flag in the EEZ of other States as long as those actions are compatible with the coastal State's rights under Articles 56 (1) (a), 73 *UNCLOS*.¹⁵² This situation, however, has no influence on the extent of the coastal State's jurisdiction and responsibility. Thus, illegal fishing in the EEZ is not a situation analogous to those in which the International Court of Justice [ICJ] or the ITLOS have held the preventive principle to apply. As a result, an application of the preventive principle is not warranted.

V. Nature and Scope of Potential Flag State Obligations

If, however, the ITLOS should decide in favor of the existence of relevant customary law, it becomes necessary to analyze the nature of such obligations. First, the ITLOS could support a customary obligation based on treaty practice and soft-law (as discussed in section C.II. above) obligating flag States to ensure that vessels flying their flag comply with the applicable laws of the coastal State. This, of course, equally applies to the content of VCC obligations. Such obligations are similar to, and perhaps based on, the flag State's general duty of control pursuant to Article 94 (1) *UNCLOS*, which aims at supervisory conduct of the flag State.¹⁵³ A potential customary rule based on the application of the preventive principle (as discussed in section IV. above) would contain similar duties.¹⁵⁴ Both obligations would be “obligations ‘of conduct’”, requiring the

adoption of legislative and administrative measures. Contrary to “obligations ‘of result’”, they would not determine a breach on the basis of an outcome, but on the basis of a State’s failure to act diligently.¹⁵⁵ As a result, not every single harmful act causing damage would lead to a breach.¹⁵⁶ Such obligations, which require States to exercise due diligence with respect to the prescribed conduct, are commonly referred to as due diligence obligations.¹⁵⁷ They are usually incorporated into treaties as “obligations ‘to ensure’”¹⁵⁸ in order to fill the gap left by the general rule of non-attribution of conduct of non-State actors to the State which has jurisdiction over them.¹⁵⁹ A direct attribution of private acts, on the other hand, would be an exception to the general rules of public international law on State responsibility.¹⁶⁰

The determination of the threshold that must be met in order to comply with such obligations is often an intricate issue. So far, due diligence obligations of flag States are considered to be objective and to require the same efforts of industrial and developing nations.¹⁶¹ As due diligence is an imprecise and relative term, the threshold for diligent conduct depends on the nature of the supervised activity, and is higher for riskier activities.¹⁶² For the obligations described above, “risk”¹⁶³ means not only risk of environmental damage, but also risk of violations of coastal State legislation aimed at conservation. As stated by the ICJ in the *Pulp Mills Case*, the exercise of due diligence “[...] entails not only the adoption of appropriate rules and measures, but also a certain level of vigilance in their enforcement [...]”¹⁶⁴ The rules applicable to private fishing vessels adopted under the domestic law of the flag State must therefore also be made enforceable and subject to sufficiently severe sanctions.¹⁶⁵

¹⁶⁴ ICJ, *Pulp Mills Case*, *supra* note 158, 79, para. 197.

¹⁶⁵ ITLOS *Case No. 17*, Advisory Opinion, *supra* note 155, para. 239.

Depending on factors such as coastal State regulatory and enforcement efforts and abilities, both the risk of damage to the marine environment and the risk of breaches of coastal State legislation can be very high. However, insufficient exercise of coastal State responsibility, particularly a failure to take sufficiently effective conservation and management measures to ensure that the maintenance of the living resources in the EEZ is not endangered by over-exploitation in accordance with Article 61 (2) *UNCLOS*, should in general be without effect on the flag State's threshold for due diligence.¹⁶⁶ Otherwise, there would be an undue shift in responsibility towards the flag State in cases of improperly regulated fisheries: The flag State would effectively be obliged to review the often insufficiently transparent coastal State efforts and legislation despite legal uncertainty and coastal State discretion.¹⁶⁷ The flag State would then have to create own *extraterritorial* legislation (and take corresponding enforcement measures) either aimed at replacing ineffective coastal State legislation and enforcement with respect to its own nationals or at least aimed at prohibiting them to fish even where the coastal State has issued a license. Even in the face of environmental concerns such an approach would seem incompatible with the coastal State's rights under *UNCLOS*, except in cases of a grave and evident breach by the coastal State.¹⁶⁸

With regard to the requirements of a breach, not every single violation suffices. Instead, a pattern of repeated violations of coastal State laws will generally be required to warrant the rebuttable *presumption* that the flag State is not exercising due diligence.¹⁶⁹ A systematic failure to exercise legislative and enforcement duties, as is commonly the case for FoCs, which leads to violations of national fisheries laws by private vessels would constitute a breach. Unfortunately, as Allen points out, the ITLOS' lax approach to assessing whether Panama complied with its general obligation to exercise effective jurisdiction and control under Art. 94 (1) *UNCLOS* in the *M/V "Virginia G" Case* provides no reason for optimism.¹⁷⁰

¹⁶⁶ Statement of the WWF, *supra* note 80, paras 23-32.

D. Conclusion

Even though a number of States have questioned the ITLOS' jurisdiction to render a full bench advisory opinion,¹⁷¹ it is likely that the ITLOS will find that it has jurisdiction and renders the advisory opinion requested by the SRFC.¹⁷² Setting aside the political ramifications of a finding of jurisdiction, the advisory opinion will be an excellent opportunity to clarify the role of the flag State with respect to illegal fishing in the EEZ. The ITLOS will be confronted with a lacuna of a fundamental nature that is deeply rooted in the EEZ regime established by *UNCLOS*. To effectively combat illegal fishing in the EEZ, the primary responsibility of the coastal State must be complemented with strong flag State obligations. So far, it has proven difficult to close normative gaps in *UNCLOS* on a multilateral level by the adoption of comprehensive and legally binding rules. This is only in part remedied on a bilateral level by the inclusion of VCCs in BFTs. However, neither this bilateral treaty practice, nor a potential application of the preventive principle seem to point to the development of a customary international law obligation of all flag States to exercise their jurisdiction and control over fishing vessels flying their flag in the EEZ of other States.¹⁷³ If, however, the ITLOS should find that such a customary rule exists, it would qualify as a due diligence obligation, requiring flag States to adopt effective legislative and enforcement measures to prevent violations by its fishing vessels. No matter how the ITLOS ultimately decides the issue, a sustainable long-term solution for the problem cannot lie in a vague customary obligation, but must be developed in the context of a new and comprehensive multilateral

¹⁷¹ While only a relatively small number of States has made comments on the substantive issues raised by SRFC's questions, four of five permanent members of the Security Council of the United Nations [UNSC] have contested the jurisdiction of the ITLOS to render full bench advisory opinions. See Written submissions, ITLOS, *Case No. 21*: Written Statement of the French Republic (29 November 2013), 2-3; Written Statement of the United Kingdom (28 November 2013), paras 4-58; Written Statement of the People's Republic of China (26 November 2013), paras 5-94; Written Statement of the United States of America (27 November 2013), paras 7-39; The Russian Federation has not submitted a Statement.

¹⁷² Which is likely given the position taken by several judges in academic writings. See for example T. M. Ndiaye, 'The Advisory Function of the International Tribunal for the Law of the Sea', 9 *Chinese Journal of International Law* (2010) 3, 565, 580-587; 'Commentary on Article 138 Rules', in P. Gautier & P. Chandrasekhara Rao (eds), *The Rules of the International Tribunal for the Law of the Sea: A Commentary* (2006), 393-394.

¹⁷³ It seems that this concern is, at least implicitly, shared by Goodman, *supra* note 73, 169; Zwinge, *supra* note 86, 322; Takei, *supra* note 96, 108.

treaty. ITLOS, *Case No. 21* provides an invaluable chance to trigger further debate and negotiations.

E. Addendum

This article was originally pre-published in the spring of 2015. Meanwhile, on 2 April 2015, the ITLOS rendered its advisory opinion in *Case No. 21*.¹⁷⁴ In addition, an arbitral tribunal constituted under Annex VII of *UNCLOS* to hear a dispute between the Philippines and China (the *South China Sea Arbitration*) has applied the abstract findings of the ITLOS in its award on the merits of 12 July 2016.¹⁷⁵ Due to the restricted nature of this addendum, it will be limited to a brief outline the most important findings of the ITLOS. For an exhaustive analysis and critical discussion of the advisory opinion and its implementation by the award in the *South China Sea Arbitration*, I have to point to my forthcoming article in *Ocean Development and International Law*.¹⁷⁶

On the question of flag State obligations, the ITLOS held that Articles 58 (3), 62 (4), 94 (2), 94 (6) and 192 apply.¹⁷⁷ In that regard, the ITLOS classified Articles 94, 192 *UNCLOS* as *general obligations* and Articles 58 (3), 62 (4) *UNCLOS* (which apply only in the EEZ) as *specific obligations*.¹⁷⁸ The advisory opinion is inconsistent as to whether the ITLOS based this obligation on a separate or conjunctive reading of the relevant provisions, but several findings support the former. According to the ITLOS, flag States were also, in cases of alleged violations of fisheries legislation, obliged to investigate and, if appropriate, take any action necessary to remedy the situation and to inform the reporting State of that action pursuant to Article 94 (6) *UNCLOS*.¹⁷⁹ As, unfortunately, the ITLOS did not offer arguments for its interpretation, it remains rather enigmatic how it arrived at these conclusions. The ITLOS did not address the question of whether customary international law provides for a similar (or identical) obligation of flag States, but Judge Paik made this point, albeit restricted to a basic obligation.¹⁸⁰ On the point of the nature and scope

¹⁷⁴ *Request for an advisory opinion submitted by the Sub-Regional Fisheries Commission (SRFC)*, ITLOS, *Case No. 21*, Advisory Opinion, 2 April 2015 [ITLOS, *Case No. 21*, Advisory Opinion].

¹⁷⁷ ITLOS, *Case No. 21*, Advisory Opinion, *supra* note 175, paras 115-124.

¹⁷⁸ *Ibid.*, paras 109-111.

¹⁷⁹ *Ibid.*, paras 118-119.

¹⁸⁰ *Ibid.*, Separate Opinion of Judge Paik, paras 19 ff.

of the obligation, the advisory opinion is largely in line with the arguments presented above (C.V). The ITLOS classified the relevant flag State obligation(s) as obligations of *conduct* rather than obligations of *result*¹⁸¹ and, in broad terms, outlined the threshold of due diligence to be fulfilled by flag States¹⁸². The ITLOS considered that flag States were under the following due diligence obligations:

- An obligation to take the necessary measures, including those of enforcement, to ensure compliance by vessels flying its flag with the fishing laws and regulations of the coastal State in its EEZ, and to prohibit any fishing activities in the absence of an authorization by the coastal State (Article 58 (3) *UNCLOS* and Article 62 (4) *UNCLOS* each).¹⁸³
- An “obligation to take the necessary measures to ensure that vessels flying its flag comply with the protection and preservation measures” enacted by coastal States (Articles 192, 193 *UNCLOS*).¹⁸⁴
- An obligation of the flag State to “exercise effectively its jurisdiction and control in administrative matters over fishing vessels flying its flag, by ensuring, in particular, that such vessels are properly marked” (Article 94 *UNCLOS*).¹⁸⁵

On the question of the responsibility and liability of flag States in cases of illegal fishing, the ITLOS considered the general international law principles of State responsibility applicable.¹⁸⁶ Finally, the ITLOS considered the frequency of illegal fishing activities by vessels flying the flag of a certain State irrelevant for the question of whether a breach has occurred.¹⁸⁷ While this last point is certainly correct, the frequency of violations may still be relevant in the context of evidence and the burden of proof, as pointed out above (C.V). It may be concluded that, while the advisory opinion has engaged in a very problematic and progressive interpretation of the relevant provisions of *UNCLOS* with respect to the question of flag State obligations, it has not supported its findings with the necessary arguments. It is submitted that Article 58 (3) *UNCLOS* is

¹⁸¹ ITLOS, *Case No. 21*, Advisory Opinion, *supra* note 175, paras 125 ff.
